

Patient opinions

"I am 49 years old and I have never had a cavity treatment without anesthesia. For the first time in my life, I leave the dental office without having a discomfort. It was fantastic" Toni Casanova - Barcelona

"They have removed 3 caries from my daughter in less than half an hour without anesthesia. My daughter is terrified of the dentist and Papacárie has given us the peace of mind we needed" Angeles Gonzalez - Alicante

Stamp of the dealer

ELIMINATE CARIES WITHOUT DRILLING

A drop of Papacárie softens caries and allows it to be detached from healthy dentin with a simple curette.

Maintains healthy tissue

Papacárie only reacts in contact with infected dentin, leaving healthy dentin intact. No other process or material saves as much healthy tooth tissue as Papacárie.

Suitable for all types of patients

This gel is completely safe and without side effects, as it does not contact toxic or irritating components. Papacárie can be used in all types of patients; young children, pregnant women, people with systemic diseases and/or disabilities. In addition, Papacárie does not generate aerosols.

Natural

The main component of Papacárie is *papain*, an enzyme extracted from Papaya. It is completely safe to use.

Clinical cases

Papacárie is a dental product used in dentistry since 2003. Its main advantage is the removal of dental caries without pain. Papacárie offers a completely atraumatic treatment, for the well-being of patients.

"I am using Papacárie in caries very close to the pulp, and I have managed to avoid four root canals by removing only the infected tissue"

Haitham Karim - Zaragoza

"Papacárie helps me to delimit affected tissue very well"

José Gaviño - Barcelona

"I am very happy with this product. I can remove caries in very young children without anesthesia or turbine. Parents are very satisfied"

Cecilia Vander Worf - Marbella
